MICROHARDNESS PRO Software

- Microhardness Pro 4.2 is an easy to use image analysis software for measuring microhardness and for generating easy to distribute Excel reports. It is a single screen Windows based system.

- The Microhardness Pro 4.2 software can handle both gray monochrome (8 bit) and color (24 bit) images. Multiple images of any size can be opened and displayed on the screen for analysis or comparison. The software supports the most common formats like BMP, JPEG, TIFF, PNG, GIF and PSD. Live images also can be observed and captured on the same platform. Since the system is in a Windows environment, graphs and charts displayed on the monitor can be quickly transferred into other Windows based programs such as, MS Word, MS Excel or any other commercial Windows based software for the purpose producing reports and presentations.
