FIRE-FIGHTING INSTRUCTIONS:

Wear a NIOSH approved positive pressure self-contained breathing apparatus with full protective clothing. Do not release runoff from fire control methods to sewers or waterways.

FIRE-FIGHTING EQUIPMENT:

Fire may produce toxic thermal decomposition products. Wear a self-contained breathing apparatus (SCBA) with a full face-piece operated in pressure-demand or positive-pressure mode.

Section 6: Accidental Release Measures

SMALL SPILLS:

Isolate area and deny entry. Ventilate area of leak or spill. Small spill can be picked up with vermiculite or other absorbent, noncombustible material. Properly protected personnel should flush spill with plenty of water, taking care not to splash personnel.

LARGE SPILLS:

Notify appropriate personnel and implement facility emergency response plan. Evacuate nonessential personnel, and isolate area. Cleanup personnel should wear fully protective equipment for skin and eye contact.

CONTAINMENT:

For large spills, dike far ahead of liquid spill for later disposal. Do not release directly into sewers or waterways. Wash walking surfaces thoroughly to reduce slipping hazard.

CLEANUP:

Absorb spilled liquid with non-reactive absorbent material. Place clean-up material in appropriate disposal containers and dispose of according to local, state and federal requirements.

**REGULATORY
REQUIREMENT:**

Any release to the environment of this product may be subject to federal, state, and/or local reporting requirements. Check with appropriate agencies.

Section 7: Handling and Storage

**HANDLING
PRECAUTIONS:**

Exercise ordinary care in handling industrial lubricants. Avoid contamination of cigarettes or other tobacco products. Wash hands thoroughly before eating

or smoking. Remove contaminated clothing and wash before reuse.

Users should be alert to the possibility that very small percentages of the population may display unexpected allergic reactions to otherwise innocuous industrial lubricants or raw materials.

**STORAGE
REQUIREMENTS:**

Do not store in open or unlabeled containers. Store in well ventilated, properly drained / contained site, away from heat, out of the sun, and away from combustibles and reactive chemicals. Use only approved containers and protect containers from damage and keep material from freezing.

Section 8: Exposure Controls/ Personal Protection

EYE PROTECTION:

Avoid eye contact. Wear safety glasses or chemical goggles in accordance with OSHA 29 CFR 1910.133.

SKIN PROTECTION:

Avoid skin contact. Wear chemical protective gloves. Depending upon conditions of use, additional protection may be necessary such as a face shield, apron, etc.

VENTILATION:

Local ventilation is generally not necessary under normal conditions of use with adequate general ventilation. Ventilation and other forms of engineering controls are the preferred means for controlling chemical exposures.

**RESPIRATORY
PROTECTION:**

Avoid breathing in mist. Respiratory protection is generally not necessary under normal conditions of use with adequate general ventilation.

SAFETY STATIONS:

Make emergency eyewash stations, safety / quick-drench showers, and washing facilities available in work area.

**OTHER
PRECAUTIONARY
INFORMATION:**

Never eat, drink, or smoke in work areas. Practice good personal hygiene after using this material, especially before eating, drinking, smoking, using the toilet, or applying cosmetics.
