## Section 1: Identification

**PRODUCT IDENTIFIER:** ULTRATHIN 2 EPOXY HARDENER  

**CHEMICAL FAMILY:** Diethylenetriamine: CAS Number – 111-40-0  

**EMERGENCY PHONE:** CHEMTREC 800-424-9300 (US) Day or night  
Customer No. 16568  

**MANUFACTURER:** PACE Technologies  
3601 E. 34th St., Tucson, AZ 85718  
Tucson, Arizona USA  
Phone: +1 520-882-6598  
FAX: +1 520-882-6598

## Section 2: Hazard(s) Identification

| GHS CLASSIFICATION: | Acute toxicity, 4, H302  
Acute toxicity, 2, H330  
Acute toxicity, 4, H312  
Skin corrosion, 1B, H314  
Skin sensitization, 1, H317  
Specific target organ toxicity - single exposure, 3, Respiratory system, H335 |

</table>
| HAZARD STATEMENTS:  | Hazard Statement(s):  
H302-Harmful if swallowed  
H312 – Harmful in contact with skin  
H314-Causes severe skin burns and eye damage  
H317-May cause an allergic skin reaction  
H330-Fatal if inhaled  
H335-May cause respiratory irritation |
| PRECAUTIONARY STATEMENTS: | Precautionary Statement(s):  
Preventions:  
P260- Do not breathe  
P261-Avoid breathing dust/fume/gas/mist/vapors/spray.  
P264- Wash skin thoroughly after handling.  
P270- Do not eat, drink or smoke when using this product.  
P271- Use only outdoors or in a well-ventilated area |

## Section 4: First-Aid Measures

**INHALATION:**
Remove victim to fresh air and provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get medical attention.
### Skin Contact
Immediately remove contaminated clothing or shoes, wipe excess from skin and flush with plenty of water for at least 15-minutes. Use soap if available or follow by washing with soap and water. Do not reuse clothing until thoroughly cleaned. Get medical attention.

### Eye Contact
Immediately flush eyes with plenty of water for 15 minutes while holding eyelids open. Rinse continuously with water while on way to get medical attention.

### Ingestion
Do not induce vomiting. Give one glass of water unless victim is drowsy, convulsing, or unconscious. Seek medical attention immediately.

### Notes to Physician
**Symptoms:**
Irritation as noted above. Lung damage (scarring, bronchitis, emphysema) may be evidenced by shortness of breath, especially on exertion, and may be accompanied by chronic cough. Skin sensitization (allergy) may be evidenced by rashes, especially hives.

### Section 5: Fire-Fighting Measures

#### Suitable Extinguishing Media:
Use water fog, “alcohol foam”, dry chemical or carbon dioxide.

Water or fog may cause frothing which can be violent, especially if sprayed into containers of hot or burning liquid.

#### Specific Hazards During Fire Fighting:
Material will not burn unless preheated. Delayed lung damage (pulmonary edema) can be experienced after exposure to combustion products, sometimes hours after the exposure. Nitrogen oxides and other potentially hazardous nitrogen-containing compounds may be released upon combustion.

Cool fire exposed containers with water.

#### Special Protective Equipment for Fire-Fighters:
Do not enter confined fire space without full bunker gear (helmet with face shield, bunker coats, gloves and rubber boots), including a positive pressure NIOSH approved self-contained breathing apparatus.
Section 6: Accidental Release Measures

PERSONNEL PRECAUTIONS: Corrosive.
Prevent all bodily contact with spilled material.
Shut off leaks, if possible without personal risk.
Remove ignition sources.

ENVIRONMENTAL PRECAUTIONS: Dike and contain.
Contain run-off and dispose of properly.
Prevent from entering into drains, ditches or rivers.

CLEAN-UP METHODS – SMALL SPILLAGE: Take up with an absorbent material and place in non-leaking containers.
Seal tightly for proper disposal.

CLEAN-UP METHODS – LARGE SPILLAGE: Remove with vacuum trucks or pump to storage/salvage vessels.
Soak up residue with an absorbent such as clay, sand or other suitable material; place in non-leaking containers for proper disposal.
Flush area with water to remove trace residue.

ADDITIONAL ADVICE: Notify authorities if any exposures to the general public or environment occurs or is likely to occur.
See Section 13 for information on disposal.

Section 7: Handling and Storage

ADVICE ON SAFE HANDLING: Do not pressurize drum containers to empty them. Heating this curing agent above 300 Deg. F in the presence of air may cause slow oxidative decomposition; above 500 Deg. F, polymerization may occur. Some epoxy resins can produce exothermic reactions which in large masses can cause runaway polymerization and charring of the reactants. Fumes and vapors from these thermal and chemical decompositions vary widely in composition and toxicity. Do not breathe fumes. Use a NIOSH-approved respirator as required to prevent overexposure. In accord with 29 CFR.1910.134, use either an atmosphere-supplying respirator or an air-purifying respirator for organic vapors.

STORAGE:
REQUIREMENTS FOR STORAGE AREAS AND CONTAINERS: Store in a cool, dry place with adequate ventilation. Keep away from open flames and high temperatures.
Section 8: Exposure Controls/ Personal Protection

PROTECTIVE MEASURES: Wear appropriate respirator and full-body protective clothing.

ENGINEERING MEASURES: Use ventilation as required to control vapor concentrations. Eye wash fountains and safety showers should be available for emergency use.

EYE PROTECTION: Do not get in eyes.
Wear chemical goggles if there is potential contact with eyes.

SKIN AND BODY PROTECTION: Do not get on skin, on clothing.
Wear chemical-resistant protective clothing such as gloves, outer clothing or apron, overshoes and a face-shield suitable to potential exposure.

RESPIRATORY PROTECTION: Do not breathe vapors or mists.
Use a NIOSH-approved respirator as required to prevent overexposure.
In accord with 29 CFR 1910.134
Use either a full-face, atmosphere-supplying respirator or air-purifying respirator for organic vapors.
Avoid breathing vapors which may be produced under some conditions such as heating or applications of uncured material in large surface areas (e.g., flooring and painting).
Avoid breathing aerosols and mists which may be formed by various methods of application.

Section 9: Physical and Chemical Properties

FORM: Liquid
COLORS: Colorless
BOILING POINT: 199 deg. C (390 deg F) at 760 mm/Hg
Section 10: Stability and Reactivity

CONDITIONS TO AVOID: Heat, flames and sparks.

MATERIALS TO AVOID: Can react vigorously with strong oxidizing agents, strong Lewis or mineral acid, and strong mineral and organic bases, especially primary and secondary aliphatic amines. Reacts with considerable heat release with some curing agents.

HAZARDOUS DECOMPOSITION PRODUCTS: Nitrogen oxides, carbon monoxide and unidentified organic compounds may be formed during combustion.

HAZARDOUS REACTIONS: Stable under normal use conditions. Hazardous polymerization will not occur.

Section 11: Toxicological Information

CHRONIC HEALTH HAZARD:

POTENTIAL HEALTH HAZARD:

INHALATION: Vapor/mists may be corrosive to upper respiratory tract. Repeated or prolonged exposure can result in lung damage.

SKIN: Corrosive to the skin. May be toxic if absorbed through skin. May cause skin sensitization.

EYES: Corrosive to the eyes and may cause severe damage including blindness. Vapors may be irritating.

INGESTION: Not likely to be a relevant route of exposure. Corrosive and may cause severe and permanent damage to mouth, throat and stomach. May be moderately toxic if swallowed.

AGGRAVATED MEDICAL CONDITIONS: Preexisting eye, skin and respiratory disorders may be aggravated by exposure to this product.

Section 12: Ecological Information

ELIMINATION INFORMATION (PERSISTENCE AND DEGRADABILITY)

BIODEGRADABILITY: No data available

ECOTOXICITY EFFECTS

TOXICITY TO FISH: No data available

Section 13: Disposal Considerations

If this material becomes a waste, it would not be a hazardous waste by RCRA criteria (40 CFR 261). Place in an appropriate disposal facility in compliance with local and federal regulations.
