Section 1: Identification

MANUFACTURER: PACE Technologies
3601 E. 34th St.
Tucson, AZ 85713

INFORMATION PHONE: 520-882-6598

EMERGENCY PHONE: CHEMTREC 800-424-9300 (US) Day or night
Customer No. 16568

TRADE NAME: Weck’s tint etch

CHEMICAL FAMILY: Ammonium bifluoride mixture

Section 2: Hazard(s) Identification

GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)
Corrosive to metals (Category 1), H290
Acute toxicity, Oral (Category 3), H301
Skin corrosion (Category 1B), H314
Serious eye damage (Category 1), H318
Specific target organ toxicity - single exposure (Category 3), Respiratory system, H335

PICTOGRAM(s):

SIGNAL WORD: Danger

HAZARD STATEMENTS:
Hazard Statement(s):
H290 - May be corrosive to metals
H301 - Toxic if swallowed
H314 - Causes severe skin burns and eye damage
H318 - Causes serious eye damage
H335 - May cause respiratory irritation

PRECAUTIONARY STATEMENTS:
Precautionary Statement(s):
Preventions:
P234 - Keep only in original container.
P261- Avoid breathing dust/fume/gas/mist/vapors/spray.
P264- Wash skin thoroughly after handling.
P270- Do not eat, drink or smoke when using this product.
P260- Do not breathe dust/fume/gas/mist/vapors/spray.
P280- Wear protective gloves/protective clothing/eye protection/face protection.
P285- In case of inadequate ventilation wear respiratory protection.

Response:
P301+310- IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.
Emergency Overview

DANGER! MAY BE FATAL IF SWALLOWED OR INHALED. AFFECTS RESPIRATORY SYSTEM, HEART, SKELETON, CIRCULATORY SYSTEM, CENTRAL NERVOUS SYSTEM AND KIDNEYS. CAUSES IRRITATION AND BURNS TO SKIN, EYES AND RESPIRATORY TRACT. IRRITATION AND BURN EFFECTS MAY BE DELAYED. HARMFUL IF ABSORBED THROUGH SKIN.

Potential Health Effects

If inhaled or swallowed, this compound can cause fluoride poisoning. Early symptoms include nausea, vomiting, diarrhea, and weakness. Later effects include central nervous system effects, cardiovascular effects and death.

Inhalation:
May cause irritation and burns to the respiratory tract, symptoms may include coughing, sore throat, and labored breathing. May be absorbed through inhalation of dust; symptoms may parallel those from ingestion exposure. Irritation and burning effects may not appear immediately.

Ingestion:
May cause salivation, nausea, vomiting, diarrhea, and abdominal pain, followed by symptoms of weakness, tremors, shallow respiration, carpopedal spasm, convulsions, and coma. May cause brain and kidney damage. Affects heart and circulatory system. Death may be caused by respiratory paralysis. Lethal dose estimated at between 1 teaspoonful and 1 oz.

Skin Contact:
Causes irritation and burns to the skin. Effects may not appear immediately.

Eye Contact:
Causes irritation. May be extremely irritating with possible burns to eye tissue and permanent eye damage may result.
Chronic Exposure:
Chronic exposure may cause mottling of teeth and bone damage (osteosclerosis) and fluorosis. Symptoms of fluorosis include brittle bones, weight loss, anemia, calcified ligaments, general ill health and joint stiffness.

Aggravation of Pre-existing Conditions:
Populations that appear to be at increased risk from the effects of fluoride are individuals that suffer from diabetes insipidus or some forms of renal impairment.

Section 4: First-Aid Measures

First aid procedures should be pre-planned for fluoride compound emergencies.

Inhalation:
If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. CALL A PHYSICIAN IMMEDIATELY.

Ingestion:
Administer milk, chewable calcium carbonate tablets or milk of magnesia. Never give anything by mouth to an unconscious person. CALL A PHYSICIAN IMMEDIATELY.

Skin Contact:
Wipe off any excess material from skin and then immediately flush skin with large amounts of soapy water. Remove contaminated clothing and shoes. Wash clothing before re-use. Apply bandages soaked in magnesium sulfate. CALL A PHYSICIAN IMMEDIATELY.

Eye Contact:
Immediately flush eyes with gentle but large stream of water for at least 15 minutes, lifting lower and upper eyelids occasionally. Call a physician immediately.

Note to Physician:
For large exposures, systemic effects (hypocalcemia and hypomagnesia) may occur.

Section 5: Fire-Fighting Measures

Fire:
Not considered to be a fire hazard.

Explosion:
Contact with water and metal at the same time may evolve flammable hydrogen gas.

Fire Extinguishing Media:
Dry chemical, foam or carbon dioxide. Do not use water.

Special Information:
In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full facepiece operated in the pressure demand or other positive pressure mode.

Section 6: Accidental Release Measures

Ventilate area of leak or spill. Wear appropriate personal protective equipment as specified in Section 8. Spills: Pick up and place in a suitable container for reclamation or disposal, using a method that does not generate dust. US Regulations (CERCLA) require reporting spills and releases to soil, water and air in excess of reportable quantities.

The toll free number for the US Coast Guard National Response Center is (800) 424-8802

Section 7: Handling and Storage

Keep in a tightly closed container. Store in a cool, dry, ventilated area. Protect against physical damage. Separate from acids and alkalis. Do not store in metal containers, as contact with moisture and metal at the same time may release flammable hydrogen gas. Containers of this material may be hazardous when empty since they retain product residues (dust, solids); observe all warnings and precautions listed for the product.

Section 8: Exposure Controls/ Personal Protection

Airborne Exposure Limits (Ammonium Biflouride):
- OSHA Permissible Exposure Limit (PEL):
  2.5 mg(F)/m³ (TWA)
- ACGIH Threshold Limit Value (TLV):
  2.5 mg(F)/m³ (TWA)

Ventilation System:
A system of local and/or general exhaust is recommended to keep employee exposures below the Airborne Exposure Limits. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. Please refer to the ACGIH document, Industrial Ventilation, A Manual of Recommended Practices, most recent edition, for details.

Personal Respirators (NIOSH Approved):
If the exposure limit is exceeded and engineering controls are not feasible, a half facepiece particulate respirator (NIOSH type N95 or better filters) may be worn for up to ten times the exposure limit or the maximum use concentration specified by the appropriate regulatory agency or respirator supplier, whichever is lowest.. A full-face piece particulate respirator (NIOSH type
Section 9: Physical and Chemical Properties

Appearance:
Clear Liquid.

Odor:
Odorless.

Solubility (ammonium bifluoroide):
41.5g/100 g Water @ 25C (68F)

Specific Gravity:
No information found

pH:
No information found

% Volatiles by volume @ 21C (70F):
No information found

Boiling Point:
No information found

Melting Point:
No information found

Vapor Density (Air=1):
No information found.

Vapor Pressure (mm Hg):
No information found.

Evaporation Rate (BuAc=1):
No information found.

Section 10: Stability and Reactivity

Stability:
Stable under ordinary conditions of use and storage.

Hazardous Decomposition Products:
Emits toxic fumes of hydrogen fluoride, nitric oxides, and ammonia when heated to decomposition. Upon contact with moisture and metal, this material may release hydrogen gas.

**Hazardous Polymerization:**
Will not occur.

**Incompatibilities:**
Reacting with acids to liberate hydrogen fluoride and base to liberate ammonia. When combined with moisture, will corrode glass, cement, and most metals.

**Conditions to Avoid:**
No information found.

---

**Section 11: Toxicological Information**

No LD50/LC50 information found relating to normal routes of occupational exposure.

**Section 12: Ecological Information**

**Environmental Fate:**
This material is not expected to significantly bioaccumulate. When released into water, this material may biodegrade to a moderate extent.

**Environmental Toxicity:**
This material is not expected to be toxic to aquatic life. The LC50/96-hour values (ammonium biflouride) for fish are over 100 mg/l.

---

**Section 13: Disposal Considerations**

Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste facility. Although not a listed RCRA hazardous waste, this material may exhibit one or more characteristics of a hazardous waste and require appropriate analysis to determine specific disposal requirements. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.
Section 14: Transportation Information

Domestic (Land, D.O.T.)

------------------------
Proper Shipping Name: CORROSIVE LIQUIDS ACIDID, INORGANIC, N.O.S. (HYDROCHLORIC ACID, AMMONIUM BIFLOURIDE MIXTURE)

Hazard Class: 8
UN/NA: UN3264
Packing Group: II
Limited Quantity Shipping: < 1 L

International (Water, I.M.O.)

------------------------
Proper Shipping Name: CORROSIVE LIQUIDS ACIDID, INORGANIC, N.O.S. (HYDROCHLORIC ACID, AMMONIUM BIFLOURIDE MIXTURE)

Hazard Class: 8
